

Group 7

Piotr Kram - @peternal_flame

I set up 3 test Metamask accounts for testing purposes: account 0, account 1 and account 2.

I deployed the Ballot contract using account 0 and used it for the testing purposes:

<https://sepolia.etherscan.io/address/0x2379ef2Cb1685b2579717BF22430f5C6a6174660>

Give voting rights:

For account 1 using account 0:

<https://sepolia.etherscan.io/tx/0x3529501c4426cef79cdbc526aca47f0d52f08b86878d335dcaccb7291bc30959>

For account 2 using account 0:

<https://sepolia.etherscan.io/tx/0xbd17d243417b4e113cdb1171fd22542db64df76ce61e49eb0af75949c0175624>

For account 1 using account 2:

Error: execution reverted: "Only chairperson can give right to vote."

Cast votes:

Account 0 voted for proposal 0:

<https://sepolia.etherscan.io/tx/0xb3e1b71c00f5688d5d61b37c46e3b0280bcd5f5fe31e585a29a1f69e87e3e0d6>

Account 1 voted for proposal 0 after delegating its vote to account 2:

Error: execution reverted: "Already voted."

Delegate votes:

To account 2 from account 1:

<https://sepolia.etherscan.io/tx/0x173a405e16ab10dabe173aaf6eafbf1a6d7248735932aab40b543b647e1e4cd7>

To account 0 from account 1:

Error: execution reverted: "You already voted"

To account 2 from account 2:

Error: execution reverted: "Self-delegation is disallowed."

Query results:

"The winner is mango"
